

Quality and HSE policy

Mecmar is a Norwegian engineering company, specialized in engineering and tailoring of exhaust gas systems for marine diesel engines and gas turbines.

Mecmar work is a close and integrated cooperation process with client from early projecting stage to ensure to meet customers' needs and demands from first contact to final installed, successfully tested and operating system. Mecmar AS is also offering servicing and spare parts and repair.

Mecmar's Quality and HSE policy are based on proactive Quality and HSE mindset and based on the philosophy of reducing possible errors and practising first time right principle. Our Quality Handbook, Quality Management System and Operation Manual are our management tool for continuous improvements through reduction of errors and deviations and.

Quality Policy

- To deliver products and services that is fully in accordance with agreed specifications and that satisfy or (overgoes) the customer's needs, demands and expectations to our delivery.
- All requirements, both regulatory and from stakeholders are strived to be satisfied
- Ensure tight relations and monitor with our suppliers to make them perform their work and deliveries in an efficient and professional manner to improve our products and services
- Ensure that all employees are competent for their areas of responsibility and that they are motivated to perform the outmost for our customers
- Innovative Technology and Optimal Performance
- Continuous development of our management system to ensure continuous learning and improvement

HSE Policy

- No Accidents, and no harm to people or work related illness
- We will strive to comply with the official regulatory from the authorities, customers and active work with the company's health performance requirements to continually improve our health performance
- Through performance reviews and competence analysis we strive to ensure that our employees have good competence and confidence in relation to the tasks to be performed and/ or to get the basis for planning targeted training program
- Through regular work environmental analysis, we will strive to prevent accidents and illness and that our working environment performance improves
- Preventing accidents through managing risks and learning by our experiences

Environmental Policy

- No environmental spills that could harm the environment.
- We will strive to comply with the official regulatory from the authorities, customers and active work with company's environmental performance requirements for continuous improvement of our environmental performance.
- Perform our work with the least possible impact on the environment and work systematically for the continual improvements of our environmental performance.
- Also through new product development for reduction of emission of pollutants normally present in exhaust gas from diesel engines the company contributes to reduce environmentally pollution
